

myCOOP Differences:

- Extreme ease of use
- Single SQL database
- All modules share data
- MS Sharepoint architecture
- Simplified data import/export
- Simplified reporting
- Dependency mapping
- International languages

myCOOP Product Features and Benefits Include:

Project Initiation

- Instant schema generation
- Hierarchical user rights
- Complete regionalization

BIA/Risk Analysis

- Survey creation
- SQL query analysis
- Export to MS Excel/Access
- Dependency graphics

Plan Design/Creation

- Support 300 file types
- Files uploading
- Database hierarchies
- External system feeds
- Customized views
- Roll-ups and roll-downs
- Browser screen design
- Plan-level security
- Properties editing
- Plans distribution
- Versioning
- Workflow
- Check-out/Check-in
- Alerts
- Publishing
- PDF printing

Awareness & Training

- Activity listings
- Calendar views
- Outlook connection

Test & Exercises

- Program validation
- Scenario repository
- Exercise calendar
- Outlook connection
- Maintenance/Updating
- Assignment automation
- Progress tracking
- Activity alerts
- Compliance metrics
- Dashboard graphics
- Gantt chart views

Incident Command

- Task assignments
- Activity logs
- Integrated global GIS
- Team views
- One-step notification
- Dashboard graphics

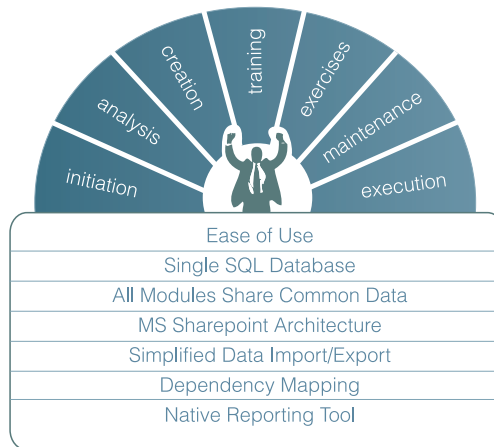

Some features sold in add-on modules

myCOOP is the first software solution to deliver on the promise of simpler, faster, lower-cost support to BCM programs.

myCOOP is simpler - for all classes of users, all functions are managed by just a browser, with all functions available within one or two clicks.

myCOOP is faster - ready for immediate use for most functions, with more complex capabilities added as needed over time.

myCOOP is less expensive - speed of deployment, light training requirements, and less of a support burden on the client result in more affordability than with traditional systems.

“myCOOP has very powerful tools to deploy rapidly, quickly use work already done, and be easily used by our continuity planners and contributors.”

Mary Lou Michaels, Fiserv

Why myCOOP?

Unify Processes across the Enterprise

COOP Systems' empowers some of the world's largest organizations by unifying all the Professional Practices, including BIA/Risk, Planning, Incident Command and Notification processes, in one instance for the enterprise.

Adaptable and Flexible Software

Organizations worldwide have selected COOP Systems because all the Professional Practices are covered in one easy-to-use seamless package delivered with power and efficiency. The result is a solution that seamlessly adapts to their unique Business Continuity methodologies while providing the flexibility to evolve their program over time.

Reliability of Software Delivery Worldwide

COOP Systems hosting services supports some of the largest organizations in the world every day securely, powerfully, and with guaranteed Service Levels of 99.99%, supported by production servers at Tier 4 SAS-70, Type II collocation centers.

Ease-of-Use Promotes Enterprise Use

COOP Systems' intuitive approach makes the end-user experience extremely productive. With little or no instruction, they manage plans quickly and easily. Quick-to-learn central Administrative tools provide program managers tools to monitor and manage the overall effort.

Adaptable BCM Software Without Custom Code

Most leading organizations have tailored their Business Continuity methodologies to match their operations. COOP Systems software rapidly adapts to these legacy standards, without having to write custom code. Upgradability of custom features is assured.
